Coolpad

Notebook Computer

Improve the cooling efficiency of your notebook

Model #PA241E

The Targus CoolPad can improve the cooling efficiency of your notebook by raising the back edge and increasing the airflow around the computer. This can be extremely helpful for notebooks that run hot or are over worked protecting your furniture from heat damage. It also makes it easy to share the display with someone next to you (for a small presentation for example). The pad consists of an upper and lower surface. The upper surface can swivel independently of the lower surface. Finally, by elevating the computer, you can more easily access peripherals (PCMCIA slots, video, parallel, & serial ports).

Key Features

- **Assists heat dissipation and improves cooling efficiency**
- **Perfect for presentations: Rotates 360 degrees and elevates your computer**
- **Protects furniture from heat and your notebook from spilt liquids**
- **Allows for easy access to peripherals (PCMCIA slots, video, parallel & serial ports)**
- **Adjustable keyboard tilt no driver needed**
- **Soft rubber that really grips any notebook**
- **Nothing to attach, just place any laptop on it and you ready to go**
